## SUMMARY

**Full Stack Developer** with 5+ years of hands-on experience designing, developing, and implementing innovative applications and solutions. Seeking to leverage extensive development expertise and technical skills to tackle challenging opportunities. Proficient in working with diverse technologies and frameworks, ensuring scalable and efficient systems. Experienced in collaborating with small and large teams across multiple projects and organizations, consistently delivering quality results.

## SKILLS

### Tools

Java

SpringBoot

React.js

Next.js

Node.js

Typescript

Javascript

PostgreSQL

CI/CD

AWS

Kafka

TailwindCss

Framer Motion

## PROFESSIONAL EXPERIENCE

2024 - Present

Lisbon, Portugal

Full Stack Software Engineer

GTH Software

- I am responsible for developing, maintaining and ensuring seamless user experiences across various platforms.
- Working extensively with microfrontends, integrating multiple components to deliver a cohesive application while ensuring high performance and scalability.
- Leverage AWS services, including S3, to manage assets, optimize data storage, and ensure efficient resource handling across different environments.
- Handle frequent site updates, including changes to licensing and content management, ensuring smooth transitions across varying configurations and environments.
- Collaborate with cross-functional teams to manage the complexity of multiple environments and servers, ensuring the stability and reliability of the online casino platform.

Technologies: React.js, Next.js, vue.js, Node.js, Typescript, Javascript S3

2023 - 2024

Lisbon, Portugal

Full Stack Software Engineer

Twistag

- As a full-stack developer, I contributed to the development and maintenance of the backend for a high-performance call center application, managing large datasets, implementing new features, and resolving bugs to ensure system reliability.
- Supported the frontend team in building a SaaS application powered by AI, leveraging Next.js to deliver innovative and user-friendly solutions.
- Handled coding, debugging, and unit testing tasks to ensure the delivery of high-quality, maintainable software, adhering to best practices for clean, secure, and scalable code.
- Actively participated in all stages of the software development lifecycle, collaborating with production operations teams to plan, prepare, and execute seamless deployments.
- Engaged in daily stand-ups and sprint planning sessions, driving project progress and alignment with Agile methodologies.

Technologies: Java, PostgreSQL, React.js, Next.js, Redis, Framer Motion, AWS, Docker, S3, Javascript, Typescript

2021 - 2023

Évora, Portugal

Full Stack Developer

Two Impulse

- Designed and developed scalable microservices with Spring Boot, delivering high-performance solutions aligned with client requirements.
- Built and optimized responsive user interfaces with React.js, enhancing usability and user satisfaction.
- Led the creation of an AI-powered file management system for an insurance company, streamlining data analysis processes and cutting processing times by a significant margin.
- Implemented real-time communication between frontend and backend systems, improving system responsiveness and user interaction.

Technologies: React, Docker, GraphQL. Node.js, Java, Spring Boot, Angular, Docker, PostgreSQL, Microsoft Azure. SOLID, React.js, Sonarqube. Kafka, Javascript Typescript

## PROFESSIONAL EXPERIENCE

2017 - 2019

Praia, Cabo Verde

Android Developer

Bonako

- Designed, developed, and maintained Android applications in alignment with design specifications to deliver high-quality user experiences.
- Refactored existing codebases to enhance performance, scalability, and maintainability.
- Created a set of applications, including solutions for mobile service companies, music apps, games for company activities, and more. Identified and resolved complex bugs, ensuring seamless functionality and intuitive user experiences.
- Built mobile applications using **Java**, integrating **RESTful APIs** and third-party libraries to enhance application features and usability.
- **Technologies:** Java, RESTful APIs, Google Maps API, Firebase, Git, Figma, SQL
